

First Grade Science Vocabulary Words

Week 11

push	moves an object away from you	
pull	Moves an object closer to you	
motion	movement	
speed	the measure of how fast something moves	

First Grade Science Vocabulary Words

Week 11

force	Makes an object move or stop moving	 The illustration shows two actions of force. In the top part, a person is pushing a large square box to the right, with the word 'push' written next to it. In the bottom part, a person is pulling on a rope attached to a point, with the word 'pull' written next to it.
gravity	the force that pulls things toward Earth	 The illustration shows a person falling off a cliff. A large downward-pointing arrow is labeled 'Gravity!', indicating the force pulling the person toward the ground.
repel	Means to push away	 The illustration shows two red magnets, each labeled with a white 'N' for North. Yellow arrows point away from each magnet, with the word 'Repel' written above them. Below the magnets, another set of yellow arrows points away from each other, labeled 'Push'.
attract	Means to pull something	 The illustration shows a red magnet labeled 'N' (North) and a grey magnet labeled 'S' (South). Yellow arrows point toward each other, with the word 'Attract' written above them. Below the magnets, another set of yellow arrows points toward each other, labeled 'Pull'.
