

Week 8

<p>matter</p>	<p>Anything that takes up space.</p>	 <p>gas</p>  <p>liquid</p>  <p>Solid</p>
<p>properties</p>	<p>One part of what something is like. color, shape, size and texture.</p>	<p>Round red shine</p>  <p>smooth juicy sweet</p>
<p>weight</p>	<p>The measure of how heavy an object feels</p>	
<p>temperature</p>	<p>A measure of how hot or cold something is.</p>	

<p>freeze</p>	<p>To change from a liquid to a solid.</p>	 A photograph showing several ice cubes in a glass, illustrating the process of freezing.
<p>melt</p>	<p>To change from a solid to a liquid</p>	 A photograph of a single ice cube melting on a blue surface, illustrating the process of melting.
<p>evaporation</p>	<p>To change from a liquid to a gas</p>	 A photograph of a white cup of coffee on a saucer with steam rising from it, illustrating the process of evaporation.
<p>condensation</p>	<p>To change from a gas to a liquid</p>	 A photograph of a glass bottle with condensation droplets on its surface, illustrating the process of condensation.

<p>solid</p>	<p>Of definite shape and volume; not liquid or gaseous</p>	 <p>Different States of Matter</p>
<p>liquid</p>	<p>something that has the consistency of water, that is neither a solid nor a gas and takes the shape of its container</p>	 <p>Different States of Matter</p>
<p>gas</p>	<p>a substance that is like air and has no fixed shape</p>	 <p>Different States of Matter</p>
<p>texture</p>	<p>How an object feels like (rough, smooth, etc.)</p>
